ABOUT US

Roadmap ERP, a leading provider of ERP solutions that help businesses of all sizes and sectors to digitize their workflows and achieve global growth with the power of IT. We are an ISO 9001:2015 & ISO 27001:2013 certified company, founded in 2004 in Puducherry, India, by experienced business professionals.

We have a team of 350+ IT experts who can deliver customized and ready-made ERP solutions for both on-premise and cloud-based deployments. We have successfully completed 250+ implementations across 50+ industry verticals. We understand the unique challenges and opportunities of each business and offer the best technology solutions to meet their needs.

We are also an Oracle Gold Partner, which gives us access to the latest innovations and support from Oracle. Our ERP software is scalable, flexible, user-friendly, and secure. It is designed to integrate and automate the core processes of any organization, such as finance, supply chain, manufacturing, HR, CRM, and more

DAIRY INDUSTRIES

The dairy industry is one of the most complex and dynamic sectors in the food and beverage industry. Dairy businesses face many challenges such as

- Managing the quality and safety of raw milk and dairy products
- Optimizing the production and distribution processes
- Complying with strict regulatory requirements and consumer demands
- Reducing costs and increasing profitability
- Innovating new products and expanding markets

Products

- Milk
- Butter
- Ghee
- Curd
- Butter Milk
- Yogurt
- Paneer
- Milk Powder
- Lassi
- Flavored Milk
- Ice cream
- Khova
- Mysore Pak
- Jill cool

WHY ERP?

To overcome these challenges, dairy businesses need specialized ERP software that can handle their specific needs and help them grow. ERP software for dairy industry is centralized business management software that plans and manages the overall operations of a dairy business. It integrates and streamlines various functions such as procurement, inventory, product development, production planning and scheduling, batch processing, quality assurance and control, costing, compliance, accounting, sales and distribution.

Improves the productivity and efficiency of dairy businesses

Assist in reducing the costs and wastage of dairy products by optimizing the use of resources

Facilitate and ensure the quality and safety of dairy products by implementing robust quality control measures

Enhance the profits and growth of dairy businesses by bringing products to market faster and more cost-efficient

ERP software for dairy industry is a valuable solution for dairy farmers to track their businesses more efficiently than other methods. It allows farmers to streamline operations, bringing products to market faster and more cost-effectively, all while ensuring compliance with strict FDA regulatory mandates.

CHOOSE US

If you are looking for a reliable and experienced ERP provider for your dairy business, look no further than Roadmap ERP. We have decades of industry experience and have worked extensively with dairy businesses to understand their challenges and provide customized solutions. We offer ERP software that is specifically designed for the dairy industry, with features that suit your needs. Whether you need to assess the component breakdown of the raw milk you receive or determine the profitability of your lines, we have built-in features that simplify and streamline your dairy-specific processes. Our ERP software is also fully integrated and cross-functional, giving you complete visibility and control over the financial side of your company.

With our ERP software, you can transform your company at an organizational level, poised to achieve results and propel your business forward. Contact us today to find out how we can help you grow your dairy business with our smart ERP solution.
